Subject Index of Volume 79

Agglomeration
application of the fluidized bed process for formulation of WG-type pesticide granules, 135

Boron minerals
decrepitation properties of some boron minerals, 167
Bubble
variation of throughflow velocity in a 2-D rising bubble, 257
Bubble aspect ratio
effect of voidage variation and bubble aspect ratio on throughflow in 2-D elliptical bubbles, 159

Cavity
influence of outward radial gas flow on particle movement in an annular moving bed, 247
Ceramic
dispersion characteristics of ceramic powders in the application of cationic and anionic polyelectrolytes, 53
Ceramic powders
fluidization of micron-size ceramic powders in a small-diameter fluidized bed, 227
Chaos theory
experimental investigations of chaotic hydrodynamic attractors in circulating fluidized beds, 211
Circulating fluidized bed
experimental investigations of chaotic hydrodynamic attractors in circulating fluidized beds, 211
Coal mining
respirable dust concentration distribution model on long-wall faces – multiple dust source approach, 121
Cohesive powders
the effect of vibration on the fluidization behaviour of some cohesive powders, 1
Colemanite
decrepitation properties of some boron minerals, 167
Compaction diagram
automated generation and analysis of powder compaction diagrams, 111
Conductimetry
liquid fluidization of particles in packed beds, 237
Contact efficiency
a small-scale regularly packed circulating fluidized bed. Part II: Mass transfer, 29
Conveying velocity
pickup and saltation mechanisms of solid particles in horizontal pneumatic transport, 173
Cyclodextrin
solid-phase complexing of ibuprofen to β-cyclodextrin by roll mixing, 269

Decrepitation
decrepitation properties of some boron minerals, 167
Diffusion
a diffusion model for dissolution phenomena in oxide powder mixtures, 11
Dispersion
dispersion characteristics of ceramic powders in the application of cationic and anionic polyelectrolytes, 53
Dispersion interface
mechanistic understanding of silicon nitride dispersion using cationic and anionic polyelectrolytes, 43
Dissolution
a diffusion model for dissolution phenomena in oxide powder mixtures, 11
Dust
respirable dust concentration distribution model on long-wall faces – multiple dust source approach, 121

Expansion behaviour
liquid fluidization of particles in packed beds, 237

Feed control device
new particulate solids pneumatic feeding device with mass flowrate control, 265
Ferromagnetism
selectivity in the magnetic separation of minerals, 147
Fluidization
the effect of vibration on the fluidization behaviour of some cohesive powders, 1
fluidization of micron-size ceramic powders in a small-diameter fluidized bed, 227
Fluidized beds
a small-scale regularly packed circulating fluidized bed. Part I: Hydrodynamics, 17
a small-scale regularly packed circulating fluidized bed. Part II: Mass transfer, 29
correlating local tube surface heat transfer with bubble presence in a fluidized bed, 69
application of the fluidized bed process for formulation of WG-type pesticide granules, 135
mass transfer between fluid and immersed surfaces in liquid fluidized beds of coarse spherical inert particles, 217
variation of throughflow velocity in a 2-D rising bubble, 257
Fluidized particles
liquid fluidization of particles in packed beds, 237
Friction coefficient
a small-scale regularly packed circulating fluidized bed. Part I: Hydrodynamics, 17
Friction factor
high-pressure vertical pneumatic transport investigation, 95

Galvanic cell
a diffusion model for dissolution phenomena in oxide powder mixtures, 11
Gas-fluidized bed
effect of voidage variation and bubble aspect ratio on throughflow in 2-D elliptical bubbles, 159
Gas–solids flow
a study of the influence of transverse forces acting on particles in gas–solid flows, 81
Granulation
application of the fluidized bed process for formulation of WG-type pesticide granules, 135

Elsevier Science S.A.

Heat transfer
correlating local tube surface heat transfer with bubble presence in a fluidized bed, 69
Hydrodynamics
a small-scale regularly packed circulating fluidized bed. Part I: Hydrodynamics, 17
experimental investigations of chaotic hydrodynamic attractors in circulating fluidized beds, 211

Kinetics
a diffusion model for dissolution phenomena in oxide powder mixtures, 11

Laser light sheet
characterization of the cross-sectional particle concentration distribution in pneumatic conveying systems, 191
Limestone
a numerical method for determination of particle size distribution of limestone based on pH-stat measurement, 273

Magnetic fluidization
selectivity in the magnetic separation of minerals, 147
Mass transfer
a small-scale regularly packed circulating fluidized bed. Part II: Mass transfer, 29
mass transfer between fluid and immersed surfaces in liquid fluidized beds of coarse spherical inert particles, 217
Moving bed reactor
influence of outward radial gas flow on particle movement in an annular moving bed, 247

Naphthalene
a small-scale regularly packed circulating fluidized bed. Part II: Mass transfer, 29

Oxides
a diffusion model for dissolution phenomena in oxide powder mixtures, 11

Packed beds
liquid fluidization of particles in packed beds, 237
Packing
a small-scale regularly packed circulating fluidized bed. Part I: Hydrodynamics, 17
Particle concentration distribution
characterization of the cross-sectional particle concentration distribution in pneumatic conveying systems, 191
Particle mounting method
sieve calibration using tacky dots, 61
Particle size
a numerical method for determination of particle size distribution of limestone based on pH-stat measurement, 273
Particle size distribution
respirable dust concentration distribution model on longwall faces — multiple dust source approach, 121
Particle velocity
high-pressure vertical pneumatic transport investigation, 95
Particulate flow
new particulate solids pneumatic feeding device with mass flowrate control, 265
Pesticide
application of the fluidized bed process for formulation of WG-type pesticide granules, 135
Pharmaceuticals
solid-phase complexing of ibuprofen to β-cyclodextrin by roll mixing, 269
Phase-Doppler anemometry
characterization of the cross-sectional particle concentration distribution in pneumatic conveying systems, 191
pH-stat measurement
a numerical method for determination of particle size distribution of limestone based on pH-stat measurement, 273
Pickup
pickup and saltation mechanisms of solid particles in horizontal pneumatic transport, 173
Pipe system
characterization of the cross-sectional particle concentration distribution in pneumatic conveying systems, 191
Pneumatic conveyors
characterization of the cross-sectional particle concentration distribution in pneumatic conveying systems, 191
Pneumatic transport
high-pressure vertical pneumatic transport investigation, 95
pickup and saltation mechanisms of solid particles in horizontal pneumatic transport, 173
Polyelectrolytes
mechanistic understanding of silicon nitride dispersion using cationic and anionic polyelectrolytes, 43
dispersion characteristics of ceramic powders in the application of cationic and anionic polyelectrolytes, 53
Powders
dispersion characteristics of ceramic powders in the application of cationic and anionic polyelectrolytes, 53
Pressure drop
high-pressure vertical pneumatic transport investigation, 95

Radial flow
influence of outward radial gas flow on particle movement in an annular moving bed, 247
Roll mixing
solid-phase complexing of ibuprofen to β-cyclodextrin by roll mixing, 269

Saltation
pickup and saltation mechanisms of solid particles in horizontal pneumatic transport, 173
Separation
selectivity in the magnetic separation of minerals, 147
Sieve calibration
sieve calibration using tacky dots, 61
Silicon nitride
mechanistic understanding of silicon nitride dispersion using cationic and anionic polyelectrolytes, 43
Solid-phase complexing
solid-phase complexing of ibuprofen to β-cyclodextrin by roll mixing, 269
Springback
automated generation and analysis of powder compaction diagrams, 111

Tacky dots
sieve calibration using tacky dots, 61

Throughflow velocity
effect of voidage variation and bubble aspect ratio on throughflow in 2-D elliptical bubbles, 159
variation of throughflow velocity in a 2-D rising bubble, 257

Ulexite
decrepitation properties of some boron minerals, 167

Upgrading
decrepitation properties of some boron minerals, 167

Vibration
the effect of vibration on the fluidization behaviour of some cohesive powders, 1
Voidage variation
effect of voidage variation and bubble aspect ratio on throughflow in 2-D elliptical bubbles, 159
